

412R2 BRAND 4.1 RM

PLACEMENT RECOMMENDATIONS & TIPS:

- One of the top choices for the Lewis footprint
- Carries the Rps1a gene for Phytophthora Root Rot
- Good choice for your no-till acres
- Excellent emergence and standability
- Excellent SCN and SDS resistance

Emergence.....2
 Lodging Score.....2
 Height.....5
 SCN Rating.....2
 Sudden Death Syndrome.....3
 PRR Resistance.....Rps1a
 PRR Field Tolerance.....4

Pubescence Color.....Light Tawny
 Pod Color.....Tan
 Flower Color.....Purple
 Hilum Color.....Black
 No-Till Rating.....2
 Specific Disease Ratings.....FE-4

PRODUCT NOTES:

Relative Maturity

4.1

Brand

412R2

TRAIT

RR2Y Genuity® Roundup Ready 2 Yield®

RR Roundup Ready®

STS STS®

RATINGS

1-2 Excellent; **3-4** Very Good;

5-6 Good; **7-8** Fair; **9** Poor

Based on comparisons with other Lewis brand soybeans, not competitive brands.

RELATIVE MATURITY

The first digit represents the maturity group and the second digit shows the maturity within the group.

EMERGENCE

1-3 Excellent; **4-6** Average; **7-9** Poor

Based on relative differences between Lewis varieties.

HEIGHT

1 Short; **9** Tall

CANOPY TYPE

1 Thin line; **9** Very bushy

SCN RATING

1 High Resistance; **9** Highly Susceptible
Resistance is measured similar to other traits for Race 3 of Soybean Cyst Nematode.

PRR RESISTANCE

Indicates the major gene for Phytophthora Root Rot resistance, blank indicates no genetic resistance.

PRR FIELD TOLERANCE

Rating based upon ability for the variety to produce in the presence of Phytophthora Root Rot after seedling stage.

SPECIFIC DISEASE RATINGS

BSR Brown Stem Rot

IC Iron Chlorosis

CR Charcoal Rot

SC Stem Canker

FE Frogeye Leaf Spot

WM White Mold

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercial product(s) has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate.
