

We invite you to become a part of the Lewis family. At Lewis Hybrids, our *One field at a time!* Intern Scouting Program introduces students to the seed industry by providing real-world work experience. Our interns get both the training that a large company like Monsanto can offer and the chance to work for a family-managed seed company. Students learn how to work with farmer customers and dealers, hone their responsibility and organization skills and increase and improve people and networking skills. Interns get the opportunity to monitor the new seed products, freeing up time for farmer customers to do other activities and spend more time with family.

Here at Lewis Hybrids, we care about our customers' farms, family and livelihood. The *One field at a time!* Intern Scouting Program is making a difference for our customers, and engaging students in a very exciting time in the seed industry.

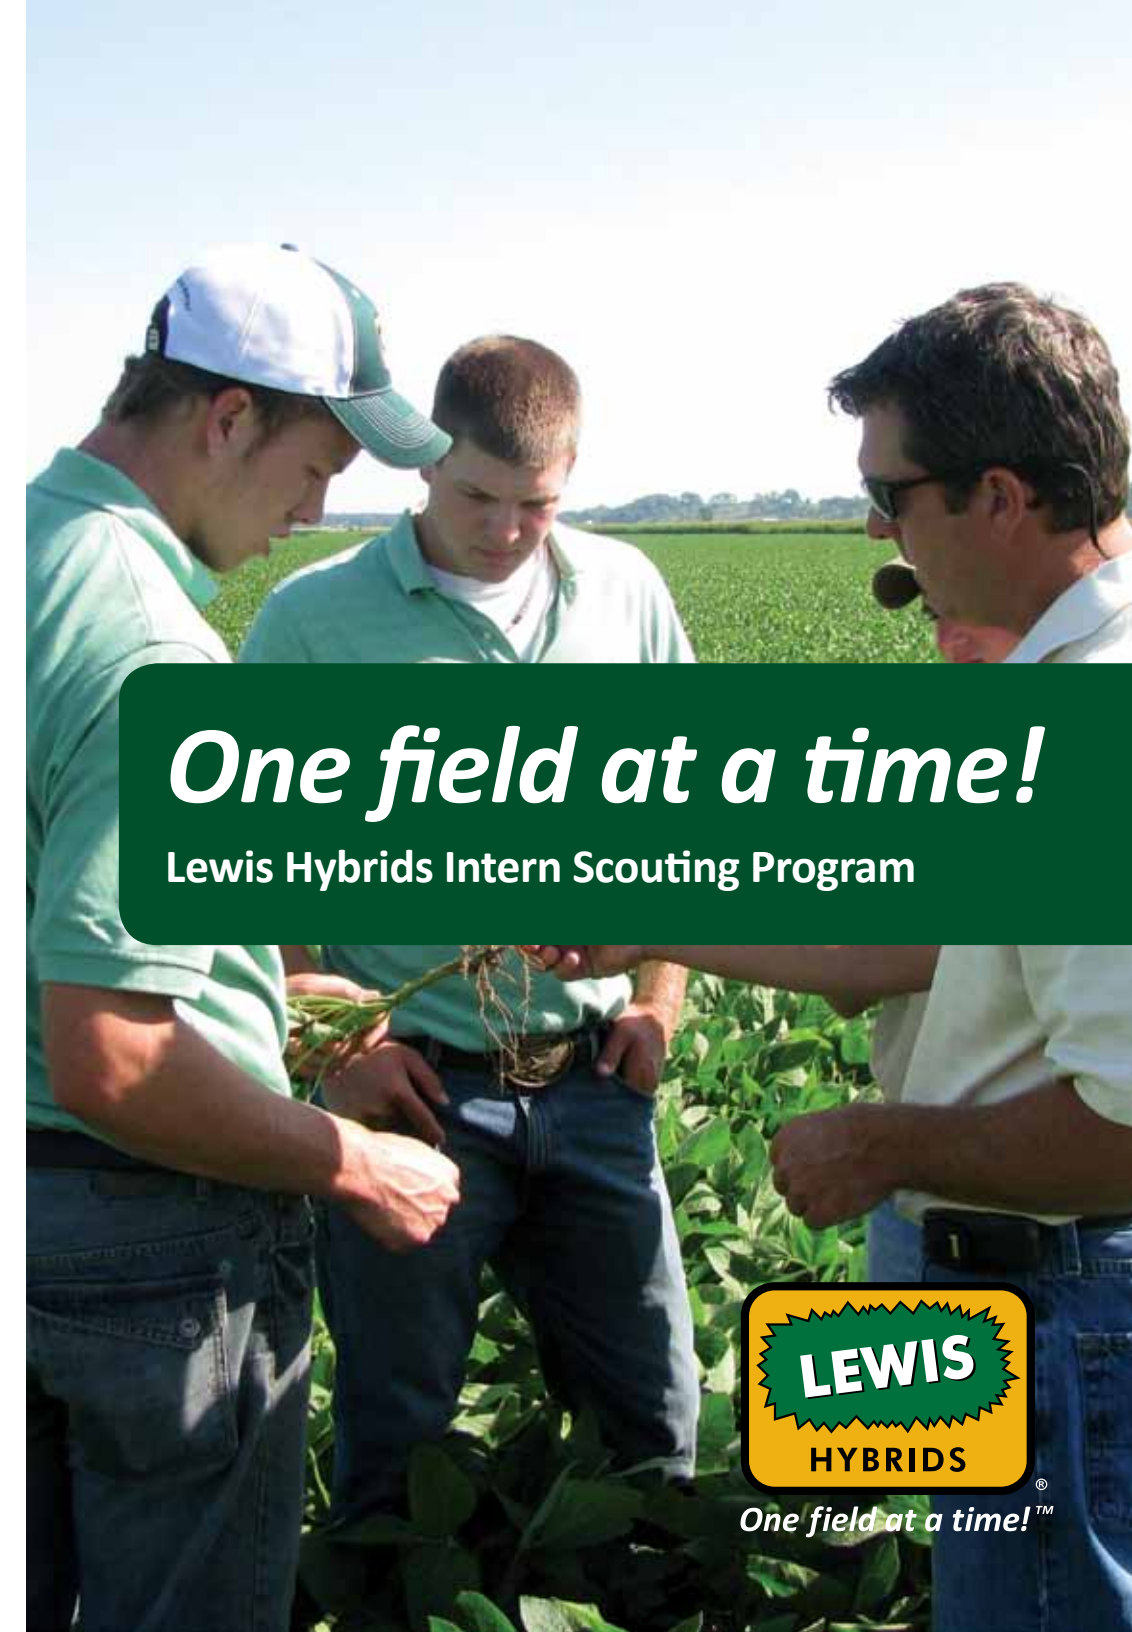

Scott Lewis
*President, Lewis Hybrids
and the Lewis Hybrids Team*

One field at a time!
Lewis Hybrids Intern Scouting Program

One field at a time!™

It's more than a tagline to us ...

At Lewis Hybrids it's about adding value to each of our customers' farms, *One field at a time!* Our Lewis interns bring that value every day by scouting, working with farmer customers and keeping a watchful eye

on customer fields throughout the summer. Our interns train with leading area agronomists and learn how to handle a wide variety of conditions, further ensuring our customers' success. With the *One field at a time!* Intern Scouting Program, our customers have more feet on the ground in their fields, allowing more time to focus on their entire operation and to spend time with family ... a winning combination!

Taking it to the Field with Lewis Hybrids

Now is your chance to take what you've learned in the classroom and apply it to real-world, in the field situations. Scout fields, learn about the latest seed technology, work with customers, and receive training from leading area agronomists ... all through the Lewis Hybrids *One field at a time!* Intern Scouting Program!

The *One field at a time!* Intern Scouting Program Opportunity:

- Gain in-field experience by identifying the agronomic situations you have studied in the classroom
- Work with multiple Lewis seed professionals including sales agronomists, district sales managers, marketing managers, and the company president among others
- Gain in-depth knowledge about the seed industry
- Work with a regional company and open your career opportunities supported by the world-wide technology leader in the corn and soybean industry
- Build relationships with farmer customers and dealers
- Develop your organization skills
- Improve your people and networking skills
- Learn what makes our year-round **Lewis Service Promise** so valuable to our customers

"I really enjoyed working for a family-based business. I gained valuable knowledge about corn production and met key people in the production industry."

Jason Twenter
University of Missouri

"I learned more about agronomy than I could ever learn in just the classroom. Hands-on learning is a great way to become educated about the industry."

Dustin Roskamp
Western IL University

"I wanted to gain experience in the seed industry and this was real-world experience. I had to learn to recognize different crop scenarios, diseases and pests."

Chad Schnettgoecke
University of Illinois
