Seeds containing the Roundup Ready trait are protected under numerous U.S. patents, including patent nos. 5,352,605 and RE39,247. It is illegal to save Roundup Ready or patented conventional soybeans for planting or transfer to others for use as planting seed.

* These products are patent pending.

RATINGS:**

1 = Excellent

9 = Poor

Based on comparisons with other Lewis brand soybeans, not competitive brands.

MATURITY:

The first digit represents the maturity group and the second digit shows the maturity within the group.

EMERGENCE:

Based on relative differences between Lewis varieties.

1-3 = Excellent

4-6 = Average

7-9 = Poor

HEIGHT:

1 = Short

9 = Tall

CANOPY TYPE:

1 = Thin line

9 = Very bushy

SCN RATING:

Resistance is measured similar to other traits for Race 3 of Soybean Cyst Nematode.

1 = High Resistance

5 = Average

9 = Highly Susceptible

PRR RESISTANCE:

Indicates the major gene for Phytophthora root rot resistance, blank indicates no genetic resistance.

PRR FIELD TOLERANCE:

Rating based upon ability for the variety to produce in the presence of Phytophthora root rot after seedling stage.

APPROXIMATE SEED SIZE:

Seed size is influenced by environmental conditions. This value represents an approximate number under normal growing conditions.

SPECIFIC DISEASE RATINGS:

BSR = Brown stem rot

IC = Iron chlorosis

CR = Charcoal rot

SC = Stem canker

FE = Frogeye leaf spot

WM = White mold

***All information is based on comparisons to Lewis Brand soybeans and for the sole use of making comparisons. The ratings are approximate and should not be considered absolute. Some ratings may change after the 2007 harvest. Performance of Lewis Brand Soybeans may be adversely affected by environmental, management, and other factors beyond our control. Extreme conditions may provide results inconsistent with ratings. No guaranties or warranties, either expressed or implied as to the performance, are intended. Consult your local Lewis sales representative for specific product information.*
