TEST COMMENTS: This site was planted into a clean, moist seedbed. Emergence was quick and stand was uniform. June and July brought hot, dry weather with some showers falling in August. Plants were standing great and threshed easily. This test was on bottom ground with thick topsoil that really helped supply moisture. Jack said the lighter hill ground really showed summer stress and yields were much lower.

† See last page for abbreviation descriptions. Results in bold are significantly above test average by LSD (0.10). ns = column values not significantly different.
